-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Since Applicant have not received the Election/Restriction mailed on 11/02/2006. Examiner resent this Election/Restriction to restart the response date. Applicant's arguments, see the response, filed on 08/21/2006, with respect to Election/Restriction requirement have been fully considered and are persuasive. The Election/Restriction requirement of 06/19/2006 has been withdrawn. The following is a new Election/Restriction requirement based on the argument:

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a measurement system for capturing a profile of an object by using a sensor unit, classified in class 356, subclass 601.
- II. Claims 22-35, drawn to a non-contact measuring system for measuring a diameter of a work piece, classified in class 356, subclass 635.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the

Art Unit: 2886

particulars of the subcombination as claimed because Group I could be used for measuring the surface shape or the surface configuration of an object and Group II uses for measuring a diameter of an object. Group II does not need to use the system of Group I (two contour sensors) to measure the diameter of the object.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Response to Arguments

With respect to applicant's arguments about Groups I-IV, Groups I & II are now grouped into one group and Groups III & IV are grouped into a different group. The new Groups I and II are distinct for reasons discussed above. The previous Election/Restriction has been withdrawn. Examiner apologizes for any inconvenience.
